PROFESSIONAL SUMMARY

Full-stack developer with 4 years of industry experience in agile software environments, progressing from QA intern to software engineer. I bring a strong foundation in both frontend and backend development, with 5 years of experience in Python, 4 years industry experience in Ruby on Rails, React and Postgres, and 4 years using data analysis tools. My background in QA gives me a sharp eye for edge cases, system behavior, and writing reliable, well-tested code.

CERTIFICATIONS

Georgia Tech | *Full Stack Developer Bootcamp*

2022

TECHNICAL SKILLS

Languages and Frameworks : Ruby on Rails, Javascript, Python, C#, .NET, React, Vue, Next, Node, Sequelize, Spanish

Databases : SQL (Postgres, Redis), NoSQL (MongoDB) DynamoDB, Snowflake

Testing Frameworks : Postman, Playwright, Qase, Manual Testing, Blackbox testing, Whitebox testing

DevOps and API Tools : Git, Docker, Swagger

Cloud and Security Tools : AWS, Heroku, Linux, Vercel

Others : Experience with messaging APIs and integrators such as hubspot, twilio, shopify, mailchimp and other third party vendors, Sidekiq

EXPERIENCE

SpringBig

Remote

Junior Software Engineer | January 2024 - March 2026

- Led the ingestion team in ticket throughput, individually processing 100+ tickets for root cause analysis on reported bugs across the Ruby on Rails backend and Vue.js frontend, identifying issues and proposing targeted solutions across all teams.
- Redesigned full application pages by translating Figma design files into production-ready Vue.js components. Responsible for 20% of total Platform team output.
- Built a React Native tool to automate the creation of S3-hosted web wallets, enabling client success managers to independently provision test wallets without developer involvement

Quality Assurance Analyst | June 2022 - January 2024

- Led QA efforts across platform, native app, and integrations teams to design comprehensive test plans covering black box, white box, edge case, and regression testing
- Led test plan and execution for a user permissions feature that introduced a role-based profile and permissions system. Tested all api related permissions across the platform for possible security risks.
- Worked within an agile scrum team to test tickets for the integrations team, which maintained connections with 20+ third-party providers across multiple areas of the application
- Used instrumentation and RSPEC to diagnose and analyze bugs directly in the code

Hechinger Report

Remote

Data, Product, and Design Intern | June 2021 - August 2021

- Built an interactive HTML/CSS/Javascript data visualization accompanying a published article on sex education
- Cleaned and formatted raw datasets to prepare them for visualization and analysis using NumPy, pandas matplotlib, and Seaborn

EDUCATION

Florida International University | *Bachelor of Arts in Journalism*

December 2020

PROJECTS

Film Registry Scraper and Tracker | *Node.js, Express, Mongoose* | Github Link

August 2026

- Python scraper for National Film Registry movies. Scrapes list, enriches data with OMDb and TMDB APIs, and adds to MongoDB database.
- Flask backend and Next.js frontend displays films as cards and gives information about each one

TechSapote Business Website | *Next.js, Payload CMS, Postgres* | Web Link | Github Link

August 2026

- Researched and using data analysis practices to write an article about the limits of sexual education in the US.
- Created an interactive map using HTML/CSS, Javascript, Bootstrap and JQuery.
- Had a D3.js data visualization showing the different kinds of sexual education programs each state had.

Personal Website | *React/Next.js* | Web Link | Github Link

August 2026

- Mobile friendly website that includes home page, projects, and about me section to be used as a business card
